

Job Posting

Petroleum Service Technician

PWI is actively seeking a highly motivated individual interested in starting or expanding a career in the Petroleum Service Industry. The successful applicant should possess the following:

- Ability to utilize and understand the components of a computer. Computer design or repair is preferred, but not required. Understand simple networking concepts and understand how to load software on PCs.
- Familiarity with AC/DC electrical principles, ability to use and understand an electrical meter and read wiring diagrams.
- Understands and enjoys working on and troubleshooting electronic components.
- Enjoy working and communicating with customers to solve problems and train on newly installed products.
- Like to work with hands and have good mechanical aptitude to understand how things operate and provide the ability to troubleshoot.
- Prefer to work outside of an office, disciplined to set own schedule and have the ability to multi task several types of issues at the same time.

If interested, please contact Ben Hieber at 717-624-2111 or email resume to jbhieber@pwiinc.com
